

DIRECTIONS

Use shaker bottle to sprinkle **Mountain Fresh** over odor causing material.

BULK PACK - Use refillable shaker bottle, or any convenient container, to carry granules to source of odors.

GENERAL USE - For best results, sprinkle into empty refuse and trash receptacles, dumpsters, and garbage trucks and add small amounts periodically or as refuse and waste are deposited. This will prevent obnoxious odors from ever getting started.

CIGARETTE URNS - Use full strength or mix with sand or any other base material. This will keep not only the urn clean smelling, but will act as a room deodorant as well.

SWEEPING - Mix with dry sweeping compound, sprinkle on floor and allow to stand a few minutes before sweeping in usual way. May also be used, without mixing with sweeping compound, in areas where treated dust mops are used.

USE INDOORS OR OUTDOORS...PLACE IN RECEPTACLES OR SPREAD OVER ACREAGE AS NEEDED AND BE ASSURED OF INSTANT AND LONG-LASTING RESULTS.
