COOLER FRESH™

PLANET FRIENDLY FORMULA

BIOLOGICAL ODOR NEUTRALIZER

SAFE TO USE IN FOOD STORAGE AREAS

APPLICATIONS FOR USE:

Cooler Fresh is a biological odor neutralizer that totally eliminates odors from your container. Unlike other products that mask odors, Cooler Fresh consumes them entirely. This is absolutely the best product on the market to turn your "Funky" smelling cooler to "Fresh" in just a few minutes.

- Coolers
- Live Wells
- Refrigerators
- Ice Chests
- Lunch Boxes
- Thawed Freezers
- Food Storage Containers

Cooler Fresh contains a specially designed fragrance that is released during the first stage of the biological odor removing process. During the second stage, the odor causing compounds are biologically consumed & removed along with the fragrance. This unique process brings the cooler back to ready-to-use condition.

DIRECTIONS FOR USE:

LIGHT ODORS: Turn nozzle to "SPRAY" setting and completely cover the surface area like you are painting. Container should be coated with a light mist until everything is damp. Close the container and let the product sit for 5 minutes. Open lid, wipe/rinse away residual product, and container is ready for use.

HEAVY ODORS: Saturate entire surface area until every inch is dripping with Cooler Fresh. Let the product sit for 10 minutes with the container closed. Open lid, wipe/rinse away residual product and container is ready for use. **Live Wells require rinsing after use. In extreme cases a second application may be necessary.**

CLEANING: Cooler Fresh is also an excellent light duty cleaner. Simply spray, wipe, and rinse to clean the entire container inside and out.

FIRST AID:

If contact with skin occurs, wash with soap & water.
If irritation persists, contact a physician.
If in eyes, flush with large amounts of water and seek medical attention.
If swallowed, seek immediate medical attention.
